

**POWERSENSE ENTERS INTO A STRATEGIC PARTNERSHIP WITH THE CHINESE COMPANY TDQS**

Tianjin China, December 4, 2009

TDQS plays a significant and key role on the Chinese SmartGrid market, by being a market leader within Power Grid planning and delivering DMS and EMS systems for the Chinese utilities.

TDQS is like PowerSense, founded on high level power engineering and excellence within the field of grid planning and power distribution, and therefore by joining TDQS and PowerSense competences this partnership will be a strong competitor on the booming Chinese SmartGrid market. TDQS will act as PowerSense agent in the territory and will support PowerSense organization entering the Chinese market.

Tianjin Tianda Qiushi Electric Power High Technology Cooperation Ltd (or "TDQS" for short is a state-level hi-tech and software company. It was founded in January 1999 under the support of national key university, Tianjin University, with registered capital of RMB 15 million Yuan. The main business of TDQS includes technology research, products development, system integration, project implementation and sales service. Since establishment, TDQS has been taking "promoting the healthy development of power grid" as its duty, dedicated to the development of automation software, technical consultation and the integration of information system, which has won it broad recognition and high appraisals from customers. Now TDQS has been the most experienced and important company in the field of urban power network planning, assessment software development and technical service, whose products and technological achievements have been applied in more than 700 projects, spreading in 3 municipalities and 159 cities of 24 provinces in China.

TDQS now has about 250 regular employees, headed by academician of the Chinese Academy of Engineering and the "Yangtze River Scholar". This is a technical service team with strong R&D capacity and rich experience. TDQS carries out scientific management, passing ISO9001:2000 Quality System Certificate in 2008. Since the establishment of its wholly owned subsidiary in November 2007, TDQS took its first step into the field of power construction designing. Now it has branch offices in Beijing, Shanghai, Nanjing, Chengdu, etc.

Looking into the future, there will be no shrinking in the responsibility of TDQS, it will continue making contribution to the development of power industry.
