

POWERSENSE[®]

PowerSense DISCOS[®] Communication Test Environment v.1

This document is confidential to the organisation receiving it. Neither the document nor the information contained in it may be revealed to any third parties without an approval from PowerSense's executive management.

Description

On the PowerSense developer webpage, it will be possible to establish a connection to the DISCOS[®] Communication Test Environment.

The following communication connections are available;

- TCP/IP – Fixed IP

The DISCOS[®] Communication Test Environment has 2 databases; 1 with Operational data and 1 with Alarm data.

Operational data will be updated every 5 min.

Alarm data will be pushed to the developer every 15 min.

All data are described in the document;

- DISCOS test results V.0

The developer needs to subscribe to the developer web page and the Alarm push service.

This is done by sending an e-mail to support@powersense.dk with information on who he is and where he wants the DISCOS[®] Communication Test Environment to send the Alarms.

Protocols are described in following documents;

- DISCOS Communication Module Protocol XML V.0 for TCP/IP - Property PowerSense
- DISCOS Communication Module Protocol MQTT V.0– Property IBM

General Terms and Conditions

Product Responsibility

PowerSense A/S
Skovlytoften 33
2840 Holte
Denmark

Support

Warranty

PowerSense A/S provides 2 years of warranty on all DISCOS[®] components.

Warranty is valid, if the mounting instructions are followed by the customer and the technical specifications are met.

If the products fail, please contact technical support (see below).

Technical Support

Instructions and manuals are provided together with the products descriptions. For further information please contact technical support (see below).

Support to start up the DISCOS[®] systems is provided as an additional service by PowerSense A/S.

Component Selection

To guarantee product compatibility, please ask technical support at PowerSense A/S for an approved DISCOS[®] components vendor list.
